

CHRISTINE MATTHÄI

Circular Sky and Sea Series

My *Circular Sky and Sea* series are abstract visual meditations originated from the interplay of air, light and water and the shifting of colors and shapes from form to formlessness. The original photographic images are digitally transformed so that colors and shapes turn into abstractions of the source image.

The encircled sky, light and sea images derived from my Mandalas series where the geometric form of the circle represents wholeness, infinity, perfection with no beginning and no end.

My intentions are to convey feelings of losing oneself in space with no sense of time and place similar to the practice of meditation. I often work with multiple layers to achieve the final image which emerges from my subconscious, the inner sea where creativity exists and from where ideas manifest in the physical realm.
